- Frostpunk
- Dark Souls II
- The Last of Us Part I & II
- God of War
- God of War: Ragnarök
- It Takes Two
- Red Dead Redemption 2
- Mortal Kombat: Armageddon
- Rampage World Tour
- Tom & Jerry in War of the Whiskers
- Tom and Jerry in House Trap
- Teenage Mutant Ninja Turtles
- Grand Theft Auto: San Andreas
- V Rising

PROFILE

- Gameplay Programmer at **Clock Wizard Games**, the independent Istanbul studio behind the co-op horror game **Demonologist**.
- Hands-on **AAA experience** at **IO Interactive**, working on **007: First Light** and **Project Fantasy** with their proprietary in-house engine.
- Building **Luden Engine**, a C++20 engine with a custom **ECS** and data-oriented design, written independently from scratch.

EXPERIENCE

Gameplay Programmer

Clock Wizard Games

10/2026 - Present · Full-time · Istanbul, Turkey (Remote)

- Gameplay systems and features for **Demonologist**.

Software Engineer Intern

IO Interactive

11/2024 - 09/2025 · Istanbul, Turkey

- Worked on **007: First Light** and **Project Fantasy** using the studio's proprietary in-house engine.
- Built a **C++ / Dear ImGui visualizer tool** used by AI programmers to debug and monitor the AI decision-making architecture on **007: First Light**.
- Created **Python automation tools** to improve QA team efficiency and workflow.
- Selected for IO Interactive's **Future Devs** program, training Turkey's next generation of AAA developers through hands-on mentorship.
- Handled **daily QA tasks** across both productions.

SELECTED PROJECTS

007: First Light (2026)

Action-adventure, Single-player, Glacier Engine · IO Interactive · PS5, Xbox Series X|S, PC, Switch 2
Contributed as Software Engineer Intern: AI debug tooling, Python QA automation, daily QA.

Project Fantasy

Online Fantasy RPG, Proprietary in-house engine · IO Interactive

Daily QA work across the production, alongside the Future Devs mentorship program.

Luden Engine (2024 - Present)

2D Game Engine, C++20, Personal Project · github.com/Esgij/Luden

Custom ECS hand-built from scratch rather than a library like EnTT, cache-friendly data layouts, manual memory management, and a full ImGui-based level editor with scene serialization. A team shipped a game with it at Global Game Jam 2026.

VOLUNTEERING

Crew Member, Sponsorship Coordinator, Game Development Coordinator, Audit Board Member

YTU DOGDOK, Yıldız Technical University Game Development Student Club

2022 - 2026 · Istanbul, Turkey

- Four years in my university game development club, a year in each role. Organized and hosted **Kramer Jam**, a large-scale game jam, coordinated sponsor negotiations for the university-wide **YTU Digital Gaming Days**, and moderated an interview series with industry professionals.
